Career Objective

Highly motivated aspirant developer with a strong technical background and a passion for building user-centric websites and applications. Proficient in front- end and back-end technologies, eager to learn and contribute to a collaborative team environment. Fluent in English and Hindi.

Projects

- REAL-TIME FACE EMOTION DETECTION USING AI/ML
  - Developed an AI-based system to detect human emotions in real time from facial expressions.
  - Implemented image processing techniques and trained ML models for accurate classification.
  - Achieved real-time emotion recognition for expressions such as happy, sad, angry, and neutral.
  - **Tech Stack:** Python, OpenCV, CNN, Machine Learning

- FUTURE P@TH: Students' one-stop solution
  - Developed a web application to assist students in identifying subjects, courses, and scholarships tailored to their interests post 10th, 12th, and graduation.
  - Utilized **AppSheet**, **AppScript**, **Google Sheets**, and **Google Sites** for seamless integration and user-friendly design.
  - Ensured data accuracy and streamlined the recommendation process, enhancing accessibility to educational opportunities.

- Tanisa - Portfolio Website
  - Built a personal portfolio website to showcase projects (Academics and Individual), certifications, and technical skills.
  - Included live project demos, GitHub repository links, and professional documents.
  - Created a responsive and visually appealing UI for better user engagement.
  - **Tech Stack:** HTML, CSS, JavaScript
